Highlights

Energy efficient

All Philips energy-saving bulbs save energy from the moment you turn the switch. During their lifetime they use fewer kW, resulting in a lower energy bill. The level of energy saving differs per lamp type and technology.

Carbon footprint

Energy-saving bulbs reduce the amount of energy use in your home, which results in a lower energy bill and less carbon (CO₂) output by your energy supplier.

Extra brightness

Brighter usually means more power, and a brighter life comes at a price. Philips energy-saving bulbs give you more light without requiring more power.

Compact size and high perform

Our smallest energy-saving bulbs are just as small as a traditional light bulb. You can now save energy and money in all your lights and lamps, without compromising on light quality.

Reliable quality

Philips keeps its promises about bulb performance. You can trust what the Philips packaging is saying about light output, lifetime and wattage equivalents to incandescent lamps.
